Many of those who want to eat sweets and coffee suffer from waiting for a long time or not knowing the list of sweets and coffee, as they have to wait a long time to order coffee and sweet and wait a long time to get it, and sometimes they discover, for example, that the type of coffee they want has It's over, so we designed a program that makes it easier for them to know dishes, prices and easy ordering

Perla Coffee application:

- • Asking people to order coffee and sweets The application without interruption helps a long way in ordering coffee and sweets.
- • In the beginning, visitors will be welcomed to Coffee Perla.
- • Then the program will display Perla Coffee to the visitors with five options: registering the user's data, displaying the list of sweets, displaying the user's data, in addition to the location of the coffee shop's branch, displaying the bill and exiting.
- • It is achieved by the name entered by the visitor.
- • After that, he will display the list, the coffee and sweets in the coffee, the price, and if he wants to deliver his clarification number.
- • The visitor is free to add the coffee and sweets he wants to his basic bill.
- • Hire, it's time, price, coffee and sweetness
