Why We Created Aufuq?

Some people face difficulties while planning to travel, and some are hesitant or afraid, since it is a new city that they will visit.

The general idea of the project is how to help these people get a reliable company or destination to coordinate their trips through an application that collects all the trip needs safely.
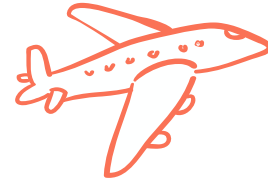

What Does Aufuq Provides ?

1. Aufuq can help you book your trips or activities and allows you to select the price option that suits you.

2. Aufuq offers variety of options to suit everyone

3. Aufuq provides a search option to let the users find what they need faster
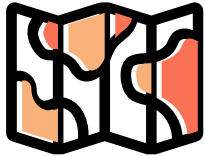

4. Aufuq provides several payment methods including cash, credit and tamara

5. Aufuq provides a gift card to surprise your loved ones

Data Collection

After observing the issues that the majority of people encountered while traveling and on trips, we decided to develop an application that would address all of these issues. However, before doing so, we wanted to gather information through surveys and in-depth interviews to learn more about the issues people face and the positive and negative aspects of their experiences. As a result, we have found helpful data. It's wonderful and will enable us to develop an intuitive integrated application that will benefit everyone.

-There is an option to go back if you want to go back to the previous page

When the user logs into the application
 - User can explore different options and search ability
 - He can filter / sort according to the price that suits him (the method of filtering is shown at the top of the page)
 - There are multiple options for trip types (Discovery, Meditation, Adventure, Historical)
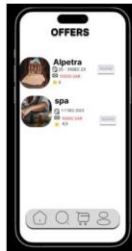

If the user click on offers, offers that we made for our users will be displayed for them with prices, ratings, and dates so user can pick one and make a reservation with a lower price than usual
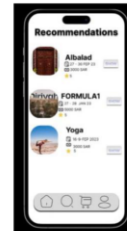

If the user click on recommendations, the activities/ events that we recommended to user based on their references or based on others ratings (top ratings) will appear to users with a date, price, rates for each of the activities. User can choose what he/she prefer to experience/ try and book it.

-If the user click on trends,

-trendy events are going to appear to user such as (leap, formula1),

-each activity/event contain a description, start and finish date/time.

-Also, the price will be displayed under each event with other users ratings the activity.
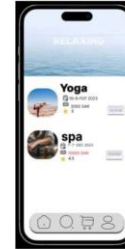

—if the user click on meditation,

-the choices Yoga and Spa will appear.

-User can choose any of these activities to meditate and relax and have a great experience using our application.

-When the user chooses "meditation"

-and when a page appears that contains two options "spa or yoga"

-and he clicks on the "yoga" option

-It has a people rating, where the yoga will be located, the time and date, as well as details about their yoga, transportation is also included

-He will see the "pay" option, and he will click on it if he wants to make a reservation

-When the user chooses "meditation"

-and when a page appears that contains two options "spa or yoga"

-and he clicks on the "spa" option

-It has a people rating, where the spa will be located, the time and date, as well as details about their services, transportation is also included

-He will see the "pay" option, and he will click on it if he wants to make a reservation

When the user chooses to Discover, one activity will appear to the user, which is Take Me to the Moon, containing the initial trip price
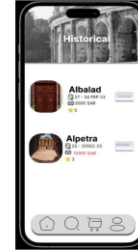

-If the user click on Historical ,
-trendy events are going to appear to user such as (Albalad, Alpetra),
-each activity/event contain a description, start and finish date/time.
-Also, the price will be displayed under each event with other users ratings the activity.

If the user presses the Adventures button, only one activity, which is camping, will be cleared for him, and it contains the price, evaluation, date, and the word show to book the event

After clicking on the word "show", a picture of the event will appear, containing the flight information and the word "purchase completion".

On the user's page, he can choose if he wants a tour guide, or by installments, by dealing with Tamara Company, or by sending it as a gift, and there is a request to enter the card data
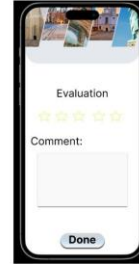

Upon completion of the payment, the program will ask the user to enter a star rating and write a comment

Upon completion of payment and evaluation a barcode will appear to the user containing a surprise
